

Mouse (Mus-Musculus) Treatment Expectations: What to Expect After Horizon Pest Control Service

Dear Valued Client,

We appreciate your trust in Horizon Pest Control for effective mouse treatments. Here's a guide on what to expect post-service:

Treatment Methods Based on Infestation Level: Depending on the infestation level determined during our inspection, Horizon employs two primary methods:

1. High Infestation Levels:

- For high infestation levels, we strategically place rodent control devices in areas prone to activity.
- These devices include glue boards, snap traps, and repeat-use mechanical traps.
- Regular inspections and maintenance are conducted, typically on a weekly basis until the problem is manageable.
- Our goal is to capture and remove rodents quickly, minimizing the opportunity for secondary pests like flies and Dermestid Beetles.
- Devices may be relocated during follow-up services based on ongoing findings.

IMPORTANT NOTE: Rodent treatments take time to work (30-60 days for large populations). Please do not return belongings until directed by the technician to avoid risks and hindering control efforts.

2. Moderate Infestation Levels:

- For moderate infestations, Horizon often employs a rodenticide baiting program.
- Anticoagulant baits are used, taking 5 to 7 days after feeding for mice to perish.
- Mice are nibblers, associating and returning to feed repeatedly.
- Tamper-resistant bait stations are strategically placed in common areas of anticipated activity, minimizing exposure risks.
- Devices may be relocated or strategically installed to leverage mouse behavior.

Protection and Proactive Measures:

- All devices aim not only to eliminate active conditions but also to proactively protect the structure from potential rodent pressure.

Follow-up Services: If the issue persists beyond 3 weeks, please contact our office at 201-447-2530 to schedule a service call. We value your understanding and cooperation in ensuring the effectiveness of the treatment.

Thank you for choosing Horizon Pest Control. Your satisfaction and peace of mind is our top priorities.
